george bernard shaw thought that a catholic university was a contradiction in terms university represents intellectual freedom and catholic represents dogmatic belief scholars university administrators and even the vatican have staked out positions debating shaw s observation in this refreshing book george dennis o brien argues that contradiction arises both from the secular university s limited concept of academic freedom and the church s defective notion of dogma truth is a central concept for both university and church and o brien s book is built on the idea that there are different areas of truth scientific artistic and religious each with its own proper warrant and method in this light he argues that one can reverse shaw s comparison and uncover academic dogma and christian freedom university infallibility and dogmatic fallibility drawing on theology and the history of philosophy o brien shows how religious truth relates to the work of a catholic university he then turns to the current controversies over pope john paul ii s recent statement *ex corde ecclesiae* which seeks to make catholic universities conform to the church s official teaching office o brien rejects the conventional institutional juridical model used by the vatican as improper both to faith and academic freedom he argues for a sacramental model one that respects the different kinds of truth thus preserving the integrity of both church and university while making their combination in a catholic university not only possible but desirable o brien concludes with a practical consideration of how the ideal catholic university might be expressed in the actual life of the contemporary curriculum and extracurriculum for anyone concerned about the place of religion in higher education the idea of a catholic university will be essential reading
